*\*requires user login and password to download*

### New Firmware

#### features:

- It is recommended that you download and use the latest version of Babyware V5.0.14 available on the Paradox website for upgrading the PCS modules and for any other programming that would be required afterwards.
- Full compatibility and control of any Paradox panel, camera, programmable output and access control doors using the Insite GOLD application via cellular connection.
- Upgradeable to V4.0 over-the-air from the cellular network or through direct connect.
- V4.0 can also be downgraded to any previous PCS version (V3.0 – V2.0) if required.
